***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/5/2006 has been entered.

***Remarks***

2. Receipt of Applicant's Amendment, filed on 07/29/2008, is acknowledged. The amendment includes the amending of claims 1 and 6, the cancellation of claims 3-5, 8-18, and 30-43, and the withdrawal of claims 19-29.

***Allowable Subject Matter***

3. Claims 1-2, and 6-7 are allowed and now renumbered as claims 1-4.

***Reasons for Allowance***

4. The following is an examiner's statement for reasons for allowance:

The Prior art fails to teach a combination of elements including initiating retrieval of the required first resource from said at least one data processing system and via said bandwidth-sensitive connection, including initiating retrieval of the required first resource via said bandwidth-sensitive connection in parallel with initiating retrieval of the required first resource from said at least one data processing system, wherein it is unknown at the time of the initiating whether bits of the required first resource will be delivered faster from the bandwidth-sensitive connection or from the at least one data processing system; and

Completing the combining responsive to a total number of bits retrieved reaching the indicated size of the required first resource, wherein the reaching of the indicated size indicates that all bits of the required first resource have been received, as recited in independent claims 1 and 6.

Specifically, the prior art generally mentions downloading parts of the same file from different sources to increase the rate of downloading and decrease bandwidth consumption, but there is no mention of not knowing which source will produce the

faster download rate. The prior art in contrast mentions knowing which source will produce a faster download rate.

These features, together with the other limitations of the independent claims are novel and non-obvious over the prior art of record. The dependent claims 2 and 7 as being definite, enabled by the specification, and further limiting to the independent claim, are also allowable.
